

FastBI Platform Guide

2026-08-19 | <https://fastbi.org>

FastBI is an open-source **business-intelligence tool** built with — a server-side, HTMX-driven port of the core of . Python-first, no JavaScript framework: a synthetic data warehouse, saved queries that render **Plotly** charts, dashboards, SQL and Cypher labs, and a conversational AI assistant that routes questio

DEVELOPER PLATFORM · API V1

Build with the FastBI API.

Read the live demo database through a typed, versioned API. Selected integration writes are implemented behind bearer-token authentication.

[Open Swagger UI](#)[Open ReDoc](#)[Download swagger.json](#)[View on GitHub](#)

Public preview access. GET endpoints require no authentication. Writes return 503 until FASTSME_API_TOKEN is configured; enabled clients send Authorization: Bearer <token>.

Resources

Queries

Governed reusable SQL queries.

```
GET /api/v1/queries
```

```
GET /api/v1/queries/{id}
```

Charts

Visualisations backed by governed queries.

```
GET /api/v1/charts
```

```
GET /api/v1/charts/{id}
```

Dashboards

Warehouse orders

INTEGRATIONS AND MIGRATIONS

Bring your data estate—and the insights already built on it.

Connect warehouse catalogues, inspect governed schemas, and rebuild the reports your teams rely on without starting from a blank canvas.

Start an integration

WAREHOUSES AND DATABASES

Connect the platforms you already run.

FastBI can ingest catalogue metadata and schema exports from cloud warehouses, lakehouses, and major SQL databases, then ground queries and dashboard generation in that structure.
